

# DARTFISH **DartGolfer**

The video analysis software designed for golf pros

**Pro Suite**

**A complete and fully integrated solution that adapts to your needs.**

**Use the video during your lessons – with no time wasted**

Give your clients a real understanding of the corrections and adjustments they need to make. Integrate the video without interrupting the pace of the lesson.

**Advanced analysis functions**

Thanks to its unique and effective analysis tools, DartGolfer allows you to compare two different swings, assess movements in detail and key technical points.

**Share your files across different formats**

Distribute video clips of your analyses and comments on CD or online. This will help your clients to keep track of their lessons and progress over time - and give you new revenue opportunities.

**Performance and simplicity**

- > Instantly transfer video footage from the camera to the computer. Run instant on-screen replays during lessons.
- > Operate the software by remote control for maximum ease of use.
- > Facilitate retrieval of clips by using multiple criteria to describe each video, such as the client's name, handicap, and type of club. Modify settings to match your needs.
- > Use the advanced Dartfish® video and drawing tools to assess, compare and annotate performance.
- > Break down key swing positions with the help of the performance analysis process.
- > Publish analysis files and video clips on CD or online. Offer your customers the chance of viewing their swing analysis on their own computer with no additional software

**All you need is...**

- > A notebook or tablet PC,
- > A video camera, and
- > Dartfish DartGolfer.

  
**DARTFISH**

### Overview of the functions

#### Record videos on your computer

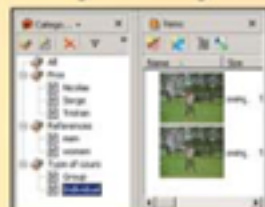

- > Transfer videos to your computer from a video camera, VCR, DVD player or television
- > Operate your video camera from the computer
- > Watch imported clips in full-screen mode

#### Use during lessons

- > Connect with either 1 or 2 video cameras
- > See instant on-screen display
- > Make direct comparisons with a reference video during the lesson
- > Operate the software by remote control
- > Use drawing tools even in full-screen mode
- > Activate the live delayer

#### Easily locate your video clips

- > Categorise video footage and create client files based on multiple criteria
- > Personalise your own classification criteria
- > Rapidly retrieve your video clips
- > Save and protect your recordings on your preferred media format

#### Advanced analysis tools

- > Play back 2 to 4 videos at once
- > Slow-motion, frame-by-frame and zoom
- > Draw "freehand", adding lines and curves straight to the video
- > Superimpose clips directly
- > Add commentaries, titles and notes

#### The unique Dartfish analysis tools

- > StroMotion: to break down a movement
- > SimulCam: a unique way of superimposing two swings within one high-quality image
- > Measure speed, acceleration and angles

#### Multimedia presentation of a video analysis

- > Create multimedia presentations integrating video, key still positions, drawings, audio commentaries and text for analysis of a particular swing
- > Use during lessons and afterwards

#### Export to the media format of your choice

- > Export your videos and multimedia files to CDs, the Internet and e-mail
- > Freely personalise CDs with your logo, address or other features
- > Allow your client to view the CDs and multimedia files with no need for additional software

#### Automatically publish straight to the Web

- > Export your multimedia swing analyses to the Internet using the software's integrated publishing facility
- > Give your clients direct access to their analysis files via a personal online account powered by Dartfish

#### System requirements

- > PC or Laptop, Windows 2000 or XP
- > Pentium III 850 MHz or better, P4, Athlon XP or Celeron 2
- > 256MB RAM, 16MB graphic card (min. resolution 1024x768)
- > Firewire (IEEE 1394) to connect the DV Camcorder
- > Parallel or USB port for protection dongle
- > DV Camcorder or analogic -> MPEG-2 converter
